FROM THE ADVISOR

Sourav Vishwakarma

“ My journey at 180 Degrees Consulting VNIT has been one of the most enriching experiences of my college life. I had known about 180DC since my JEE preparation days, so joining the VNIT chapter in my second year was exciting and fulfilling. Through consulting projects, case competitions, and industry exposure, I developed strong problem-solving, communication, and business understanding skills, which also helped me secure a valuable internship.

As the Client Acquisition and Partnership Director, I worked closely with an incredible team to onboard multiple projects, including an international collaboration, while also conducting sessions for juniors and building connections with founders and professionals.

For juniors, 180DC is far more than a club, it is a platform to learn, experiment, and grow personally and professionally. Staying curious, taking ownership, and actively participating can help you gain the most from the experience.

”

Mayank Gupta

“ I joined 180DC VNIT to explore a path beyond coding and core engineering—consulting, where structured problem-solving meets people and impact. What started as curiosity soon became a journey filled with projects, client pitches, industry reports, mentorship, and year-long collaborations. From handling deadlines and team conflicts to delivering under pressure, every challenge became a lesson. As an advisory member, I worked to ensure the club stayed on the right path while continuing to build meaningful work. 180DC VNIT didn't just give me experience; it shaped the way I think, communicate, plan, and solve problems like a consultant. The journey was intense, challenging, and deeply rewarding and I'll always be grateful for the growth it gave me.

”

Varad Nilawar

“ Serving as an Advisory member at 180 Degrees Consulting VNIT has been an incredibly rewarding experience. The core team carried forward the foundation we built and elevated it further by introducing impactful projects, organizing new events, and spreading awareness about consulting and product management within the institute. Their dedication, leadership, and ability to innovate truly stood out.

One of the most impressive achievements was the growth of Vishleshan, which has become one of the strongest initiatives at VNIT through consistent effort and vision. Beyond the professional aspect, the bond shared with the team made the experience even more meaningful. The juniors were approachable, driven, and always eager to learn, creating a very positive and collaborative environment.

It was inspiring to see the team bring in fresh ideas and build upon initiatives in ways we had never imagined. Their connection with alumni and seniors was also commendable, which helped maintain continuity and guidance for the club. Overall, it was a memorable tenure filled with learning, growth, and meaningful interactions.

”

FROM THE ADVISOR

Kaushik Reddychetty

“Joining 180 Degrees Consulting during my second year at our college felt like absolute perfect timing. Being selected as part of their very first cohort of consultants was a unique privilege that set the stage for immense growth. Looking back, the rigorous strategies we passionately brainstormed together laid a remarkably solid foundation. That analytical framework consistently supported me through the demanding coursework and challenges of the rest of my graduation. Evolving into a Consulting Director was a deeply formative and transformative experience. It did not just build a line on my resume; it fundamentally shaped who I am today. The role taught me the delicate nuances of truly connecting meaningfully with diverse groups of people and leading teams. More than anything, the invaluable lessons, mentorship, and practical experiences from 180DC gave me the absolute courage, clarity, and unwavering conviction to successfully launch and run my own venture today.”

”

Tanvi Malode

“Working with 180DC VNIT throughout my journey in E-Cell has genuinely been a great experience. What I really appreciate about the team is the way you all have built a culture of professionalism, ownership, and continuous learning within the campus.

Seeing students work on real-life consulting projects and contribute to startup founders, NGOs, and international organisations at a college level is genuinely commendable. Along with that, the efforts taken by the team to create awareness about consulting and analytics in VNIT have also been very impactful for students who want to explore this field. The collaboration with ISB this year is the prime example of those efforts.

Over the years, I've seen 180DC grow into a strong and dedicated community that is always ready to learn, adapt, and create meaningful impact. I'm really grateful that I got the chance to be a part of this wonderful community. Special mention to the Directors & Consultants of the year 2025-26, I have seen all the hardwork you guys have put in our projects and events, really appreciate it!.

”

BRIEF HISTORY

180 Degrees Consulting, VNIT, founded in 2023 is the Seventh branch of 180 Degrees Consulting organisation. Working diligently, we strive to make a significant difference by improving the effectiveness of socially conscious organisations all across the Indian subcontinent and other parts of the world.

CAMPUS POSITIONING

Over the course of the last two years, our branch has had 10+ projects with 70+ consultants that have been a part of it. As one of the top-performing branches of 180 Degrees Consulting in Central India, we have worked with NGOs, venture capital firms, and start-ups to help them improve their social impact and scale their operations. We have been successful in carving a niche for ourselves and demonstrating consistency, creativity and success.

WHY WE EXIST?

The primary vision of 180 Degrees Consulting, VNIT has always been to bring about tangible change in the society. It has been our drive to ensure that we promote a culture of excellence in whatever work we undertake, and push for the highest standards of quality. We try our best to transform the lives of people around us, inspire a sense of collective belongingness and create real social impact on the ground. With good planning, comes good implementation, and we work with great dedication towards ensuring that we constantly improve upon our existing strengths and create the leaders of the future.

Continuously creating value for socially-conscious organisations, ensuring timely, vision-based and innovation-driven management of business complexities.

The work we undertake creates all round development not only for the individuals working on it, but also those who benefit from it. We ensure that our consultants always contribute with great dedication to all the work we undertake.

PAST PROJECTS

01. FEEDING INDIA BY ZOMATO

feeding india
A ZOMATO GIVEBACK

Feeding India initiative by Zomato which is dedicated to addressing hunger and minimizing food waste across the country
Problem Statement: Feeding India needed help identifying eligible NGOs in Maharashtra to expand its **Daily Feeding Program**. The challenge was to research, and connect suitable organizations that met specific food distribution and certification criteria

Deliverables:

Analysis &
Research

Expansion
strategy

Improved
Operations

02. GramIQ

GramIQ is an AI-powered agricultural intelligence platform and app designed for farmers to manage operations, record finances, and access market information in local languages.

Problem Statement: GramIQ aims to scale its B2B footprint by positioning its AI WhatsApp chatbot as a core communication infrastructure for agricultural enterprises. By bridging the rural digital divide the platform seeks to drive high-volume revenue growth through strategic intelligence partnerships..

Deliverables:

Analysis &
Research

Expansion
strategy

03. GAME

GAME works as a catalyst to build district-level entrepreneurship ecosystems across India by transforming local resources into solutions for local needs and creating pathways to larger markets.

Problem Statement: Nagpur's food MSMEs face challenges in supply chain, funding, technology adoption, market access, etc limiting their growth and scalability

Deliverables:

Challenge -
Solution Report

PAST PROJECTS

04. SPACE ERA

Space Era Fellowship is an Indo-German exchange initiative that connects students and young professionals with global industry, innovation and entrepreneurship opportunities through immersive international experiences.

Problem Statement: The Space Era Fellowship seeks to establish a financially sustainable and scalable Indo-German exchange program that delivers premium industry exposure, innovation access and cross-cultural learning experiences for Indian students and young professionals.

Deliverables:

Feasibility
Analysis

Pricing and
Value Proposition

Growth
Strategy

Revenue
Model

GTM
Strategy

05. HEALTHCOCO

Healthcoco is one of the leading healthcare, wellness, and happiness platform started with a vision of empowering everyone.

Problem Statement: Health Coco seeks to enhance its digital presence and engagement by leveraging Facebook, Instagram, email, SMS marketing, and SEO to maximize brand visibility, increase customer acquisition, improve retention rates, and drive sales growth.

Deliverables:

Advertising
campaigns

Email
Marketing

SEO

06. OMNIFLO

Omniflo, a Bangalore based StartUp enabling **omnichannel expansion** for D2C brands

Problem Statement: It revolves around the need to improve the efficiency and profitability of the existing in-store sampling process. this includes addressing challenges such as **operational inefficiencies** and the **lack of monetization opportunities**

Deliverables:

Enhanced
Sampling Flow

Dynamic
Dashboard

Monetization
Framework

PAST PROJECTS

07. YAAPT

YAAPT is a student-centric **educational platform** combined with the power of AI, enables the sharing of academic resources such as notes and other student-helpful resources.

YAAPT aimed to become a go-to academic support platform for students but faced limited adoption, and onboarding friction. The challenge was to drive awareness, usage, and trust by promoting its collaborative learning features effectively on campus.

Deliverables:

Impact creation
report

Fund raising
strategy

08. ARMA

African Refugee and Migrants Aid (ARMA) focuses on aiding refugees, asylum seekers, and migrants, aims to improve their living conditions and integrate them into society

Problem Statement: ARMA seeks a strategy to expand fundraising avenues to support regional growth, volunteers recruitment, and other programs. ARMA also seeks for grant databases and enhancement of the Skill Development Program.

Deliverables:

Fund raising
strategy

Grant
Databases

Enhanced
SDP

Social Media
Strategy

CONSULTING METHODOLOGY

CASE COMPETITION: VISHLESHAN

Vishleshan – The Flagship Case Competition

180 Degrees Consulting VNIT Nagpur hosted Vishleshan, its national-level flagship case competition, on the Unstop platform. The event drew participation from students across India's leading institutions, including IITs, NITs, IIITs, and BITS, all competing to solve real-world business problems. Participants developed innovative, actionable solutions under the guidance of mentors and industry experts, fostering creativity, problem-solving, and analytical thinking. This year's edition marked a significant leap in scale and impact, with over 800 students participating and generating more than 50,000 social media impressions. Vishleshan continues to serve as a powerful platform connecting top student talent with business-relevant case studies, while giving partner organizations enhanced visibility and direct access to the leaders of tomorrow.

3 Rounds

150+ Participants

40+ Colleges

PRODUCT HACKATHON: ESCAPE ROOM

Escape Room – The Product Hackathon

Escape Room, the flagship product hackathon organized by 180 Degrees Consulting VNIT Nagpur, brought together 100+ participants from diverse institutions to solve real world innovation challenges through a fast-paced, multi-round competition. The event featured three intensive stages - a guesstimate round testing analytical thinking, a case problem round focused on strategic problem solving, and a final prototype building round where teams transformed ideas into practical product solutions. Participants showcased creativity, innovation, and execution skills, making Escape Room a dynamic platform for aspiring product thinkers and builders.
