FROM THE ADVISOR

“As I pen this note, I find myself reminiscing about the very first days of our journey—three third-year undergrads, no systems, no established procedures, just a drive to help businesses and carve out a brand for ourselves. We started with nothing but ambition and a genuine desire to solve real problems. We thought our mission would end with winning projects and collecting accolades for the club. But somewhere along the way, we found that the real reward was so much deeper.

Shreyas Jaiswal

We built more than a club: we became a high-performance team. Not just a club that calls itself a family, but a collective that sets ambitious goals, pushes each other to learn and deliver, and always steps up when the stakes are high—like athletes on the field, always ready for the next challenge.

Together, we saw the transformation our skills and passion brought to every project. We saw businesses thrive with our strategies, teams of students growing into confident consultants, and, most memorably, smiles on the faces of the children at the NGOs we supported. In those moments, it became clear—this is the true purpose. It's about impact. It's about growth—yours, your clients', and the communities you touch.

So, to the batches that follow: hold on to that curiosity, the hunger to learn, and the courage to build something from scratch. Cherish every brainstorming session, every late night of research, every pitch deck, and every heartfelt thank you from those you serve. Remember, the systems and processes will come, but it's your drive, passion, and team spirit that form the real backbone of 180 DC VNIT.

Go forth, make an impact, and keep raising the bar. I can't wait to see how

”

“I still remember the night before we were about to take our very first bootcamp session for 180DC we were nervously putting together a deck, trying to figure out how a couple of third-years would teach skills we were just beginning to grasp ourselves. That moment really captured what 180DC became for me: a space to figure things out while building something new and innovative.

Kshitij Burman

Some of my best memories come from long brainstorming sessions, late-night deck-making, and dealing with countless rejections while trying to onboard clients. Through it all, I got to work with some brilliant people who became close friends.

To future batches: take this space seriously, but don't forget to enjoy the ride. Learn, unlearn, and build with intent. Question things. And most importantly, leave the organisation better than you found it. You'll be surprised how far it takes you.

”

FROM THE ADVISOR

Ishan Pandey

“

As the first advisory batch for 180DC, we brought real experience with us on the table, the experience of strategizing and getting things done. The journey at 180dc and E-Cell has been phenomenal one for me. They both helped me in inculcating the ability to work in cross-functional teams and making things happen from ideation to execution. This further helped me in understanding the student community that we want to impact and the empathy towards the student segment of aspiring consultants and data analysts.

Working in both of these organizations helped me in bagging, off-campus opportunities as well as providing me confidence during the placement season as well.

”

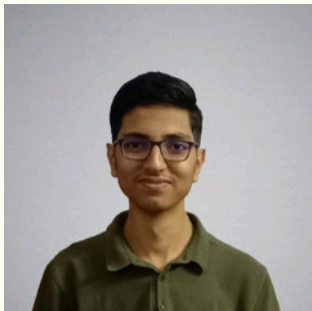

Pranay Gaidhane

“

Being a part of 180 Degrees Consulting VNIT has been one of the most exciting experiences of my college life. As a team member, I got the chance to learn about the consulting world and understand how real life business problems are solved. From working on case studies to contributing to client projects, every step taught me something new. I really enjoyed brainstorming with the team, sharing ideas, and learning from others. It helped me understand what consulting is all about and made me more interested in this field. I'm grateful to be a part of this team and hopeful to see 180DC VNIT reach new heights and impact more students in the years to come.

”

Devesh Khilnani

“

Being part of the founding core team of 180DC VNIT was both a challenging and fulfilling journey. In the early days, it wasn't easy to convey the value of this club on campus, but I always believed that if something meaningful had to be built, someone had to take the first step, so why not now? From explaining what consulting really means, to reaching out to startups and NGOs for projects, and learning how to manage a team, everything I picked up here was from scratch. 180DC felt like a mini version of the real corporate world. It taught me how to take ownership, solve problems, and collaborate effectively, all of which continue to help me in my professional life today. If you're even slightly curious about consulting, social impact, or just building something valuable, this is the place to be

”

Dhiraj Bobade

“

As a part of 180 DC VNIT, I got a chance to work with some brilliant minds. Mostly I was involved with the social impact projects, and had fun guiding. Discussions were amusing and the best part of the journey which I will cherish, toast to my teammates Kshitij, Shreyash, Devesh and Ishan for always putting their utmost efforts for making the consulting experience worthy for all, it was an awesome experience full of learnings altogether. Thanks again team 180 DC and All the best to all the torchbearers.

”

BRIEF HISTORY

180 Degrees Consulting, VNIT, founded in 2023 is the Seventh branch of 180 Degrees Consulting organisation. Working diligently, we strive to make a significant difference by improving the effectiveness of socially conscious organisations all across the Indian subcontinent and other parts of the world.

CAMPUS POSITIONING

Over the course of the last two years, our branch has had 10+ projects with 70+ consultants that have been a part of it. As one of the top-performing branches of 180 Degrees Consulting in Central India, we have worked with NGOs, venture capital firms, and start-ups to help them improve their social impact and scale their operations. We have been successful in carving a niche for ourselves and demonstrating consistency, creativity and success.

WHY WE EXIST?

The primary vision of 180 Degrees Consulting, VNIT has always been to bring about tangible change in the society. It has been our drive to ensure that we promote a culture of excellence in whatever work we undertake, and push for the highest standards of quality. We try our best to transform the lives of people around us, inspire a sense of collective belongingness and create real social impact on the ground. With good planning, comes good implementation, and we work with great dedication towards ensuring that we constantly improve upon our existing strengths and create the leaders of the future.

Continuously creating value for socially-conscious organisations, ensuring timely, vision-based and innovation-driven management of business complexities.

The work we undertake creates all round development not only for the individuals working on it, but also those who benefit from it. We ensure that our consultants always contribute with great dedication to all the work we undertake.

OUR PROJECTS

01. ARMA

African Refugee and Migrants Aid (ARMA) focuses on aiding refugees, asylum seekers, and migrants, aims to improve their living conditions and integrate them into society

Problem Statement: ARMA seeks a strategy to expand fundraising avenues to support regional growth, volunteers recruitment, and other programs. ARMA also seeks for grant databases and enhancement of the Skill Development Program.

Deliverables:

Fund raising
strategy

Grant
Databases

Enhanced
SDP

Social Media
Strategy

02. FEEDING INDIA BY ZOMATO

Feeding India initiative by Zomato which is dedicated to addressing hunger and minimizing food waste across the country

Problem Statement: **Feeding India** needed help identifying eligible NGOs in Maharashtra to expand its **Daily Feeding Program**. The challenge was to research, and connect suitable organizations that met specific food distribution and certification criteria

Deliverables:

Analysis &
Research

Expansion
strategy

Improved
Operations

03. YAAPT

YAAPT is a student-centric **educational platform** combined with the power of AI, enables the sharing of academic resources such as notes and other student-helpful resources.

YAAPT aimed to become a go-to academic support platform for students but faced limited adoption, and onboarding friction.

The challenge was to drive awareness, usage, and trust by promoting its collaborative learning features effectively on campus.

Deliverables:

Impact creation
report

Fund raising
strategy

PAST PROJECTS

04. OMNIFLO

Omniflo, a Bangalore based StartUp enabling **omnichannel expansion** for D2C brands

Problem Statement: It revolves around the need to improve the efficiency and profitability of the existing in-store sampling process. this includes addressing challenges such as **operational inefficiencies** and the **lack of monetization opportunities**

Deliverables:

Enhanced
Sampling Flow

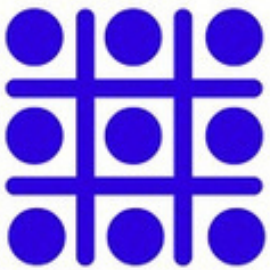

Dynamic
Dashboard

Monetization
Framework

05. HEALTHCOCO

Healthcoco is one of the leading healthcare, wellness, and happiness platform started with a vision of empowering everyone.

Problem Statement: Health Coco seeks to enhance its digital presence and engagement by leveraging Facebook, Instagram, email, SMS marketing, and SEO to maximize brand visibility, increase customer acquisition, improve retention rates, and drive sales growth.

Deliverables:

Advertising
campaigns

Email
Marketing

SEO

CONSULTING METHODOLOGY

CASE COMPETITION: VISHLESHAN

The banner features a dark green background with a geometric cube pattern. On the left is the 180Degrees Consulting VNIT Nagpur logo. The center displays the 'विSHLESHAN' logo, 'VNIT FLAGSHIP CASE COMPETITION', and 'Knowledge Partner CΔSEPREP.CO'. Below this are logos for 'in association with' including FORTIS, Wipro, GEEBEE EDUCATION, PERKINS, and BRAINWORKS. It also states 'PRIZES WORTH 120K' and 'CHANCE TO GET AN INTERNSHIP AT BRAINWORKS'. The bottom right corner contains contact information: 'Kaushik: 7354651575' and 'Mayank: 9326060530'.

Vishleshan - The Flagship Case Competition

180 Degrees Consulting VNIT Nagpur hosted Vishleshan, its national-level flagship case competition, on the Unstop platform. The event drew participation from students across India's leading institutions, including IITs, NITs, IIITs, and BITS, all competing to solve real-world business problems. Participants developed innovative, actionable solutions under the guidance of mentors and industry experts, fostering creativity, problem-solving, and analytical thinking. This year's edition marked a significant leap in scale and impact, with over 800 students participating and generating more than 50,000 social media impressions. Vishleshan continues to serve as a powerful platform connecting top student talent with business-relevant case studies, while giving partner organizations enhanced visibility and direct access to the leaders of tomorrow.
